Summary

Angular Developer with a strong track record of delivering scalable, user-centric web applications across diverse industries. Skilled at translating business requirements into effective technical solutions that enhance user engagement and drive product success. Experienced in collaborating with cross-functional teams, owning feature development, and optimizing performance. Seeking to contribute to impactful projects by combining technical expertise with strategic thinking and team collaboration.

Experience

Senior Software Developer, Wattmonk Technology – Gurugram, IN Nov 2024 – Present

- Developed a scalable **e-commerce-style Order Management System (OMS)**, enabling users to order solar services in a single-step flow, reducing order time by **70%**.
- Integrated **AI-powered document parsing** to auto-populate form data from uploaded PDFs, eliminating over **90%** of manual input and significantly improving user efficiency.
- Designed and implemented **modular, reusable UI components** with responsive layouts and dynamic validations, enhancing maintainability and increasing **form submission rates by 60%**.
- Built a custom **web-based Drafting Tool** to replace **AutoCAD** for the Operations team, streamlining house layout creation and delivery. Integrated a **DXF parser** to load and visualize architectural data on **Google Maps**, enabling precise layout alignment and browser-based editing.

Angular Developer, Stupa Sports Analytics – Gurugram, IN May 2024 – Oct 2024

- Developed a **Tournament Organizing System** for the European Table Tennis Union, supporting custom roles, player registration, fixtures, orders, and invoicing for federations in Spain, Norway, Sweden, and Slovenia.
- Built and integrated frontend modules with backend **microservices** for registration, order processing, and invoicing, ensuring a seamless and responsive user experience.
- Implemented **multi-language support** and mobile responsiveness, optimizing UI performance to handle high traffic during live tournaments.

Software Developer, Benepik Technology Pvt. Ltd – Gurugram, IN April 2021 – May 2024

- Built and enhanced core modules including **Campaign Management**, **TDS Handling**, **Refer & Earn**, and **Incentive Tracking**, contributing to **60% revenue growth**.
- Led the development of a **white-label web app** for a leading insurance firm, used by over **70,000 advisors**, and launched a **WhatsApp-based loyalty platform**, increasing adoption by **35%** in the first month.
- Conducted comprehensive **User Acceptance Testing (UAT)** and implemented performance enhancements to improve platform reliability and user experience.

Education

B.Tech - Computer Science & Engineering, Indira Gandhi University 2017 – 2021

Skills

Angular Ecosystem: Angular • TypeScript • RxJS • Angular Material • PrimeNG • HTML • SCSS/CSS • JavaScript (ES6)

UI & Visualization: Bootstrap • Highcharts • Chart.js • Animate.css • XLSX.js

APIs & Integrations: REST APIs • HTTP • AJAX • JSON • Google Maps APIs (Drafting Tool) • DXF Parser • CometChat • Payment Gateway Integration • PdfMake • TCPDF • AWS

Dev Tools & Methodologies: Git • GitHub • NPM • Jira • Agile • Scrum

Achievements

- **2x Employee of the Month** – Recognized for outstanding performance and timely project delivery.
- **Scalable Frontend Development** – Developed and maintained the frontend of two enterprise platforms handling **50,000–70,000+ users**, ensuring high performance, responsiveness, and a smooth user experience.
